QUICK REFERENCE GUIDE

For detailed instructions, please consult your User Documentation Disc. The *Operations Manual* details the operations of your system. For information on individual pieces of equipment, please reference the *Component Library*.

VIDEO SOURCES allow you to choose the video evidence source that you want to display on the courtroom display devices. Some locations have more than one source available and will display a popup window with various selections available at that location.

[MUTE VIDEO] allows you to turn on/off gallery, witness, or all video. Use [SHOW TO ALL] to display evidence to everyone in the courtroom.

PHONE CONFERENCE allow you to conduct an audio conference within the courtroom. Audio from the party you call can be heard on the courtroom speakers and the party you call will hear all of the courtroom microphones and auxiliary audio sources. Volume controls allow you to adjust the audio level to and *from* the party you are connected with.

Note: This page is password protected.

VIDEO CONFERENCE CONTROLS allow you to conduct and control a video conference. Use the keypad buttons to enter the number you wish to dial in the on-screen dial window. After entering the number you wish to dial, press [CALL] to begin the call process.

There are shortcut buttons on this page that display additional pages for camera control and video source selection. Additional buttons allow you to select which camera is displayed to the Far-End party during a videoconference.

VTC Sources allow you to choose the video source(s) that you want to display to the Far End. You can choose a single source or a combination of sources, while selecting which evidence source you would like to display.

Choosing Document Camera will display the Document CAMERA CONTROLS.

.22.201

CAMERA CONTROLS allow you to select one of the cameras and adjust its position. You can pan, tilt, zoom, adjust the focus or activate auto focus, and store and recall presets for all courtroom cameras.
